

How do Food Retailers Manage Site Assets?

Managers are having to call internal & external subcontractors to fix faulty assets on site.

The non-functioning assets impact revenue for Shops & Restaurants.

What is the Problem for Retailers?

The time it takes to repair faulty assets.

The missed Service Level Agreements.

The lost time because of admin.

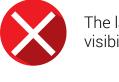

The communication issues between the office staff and field Service Supply Chain.

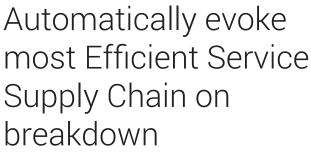

The downtime of assets affecting Business Efficiency and Revenue.

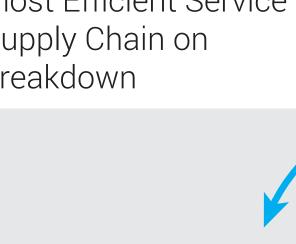

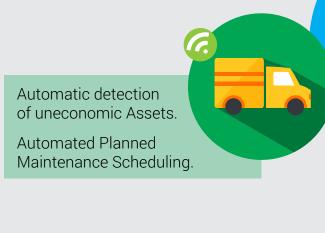

The costs involved with repair, parts & service.

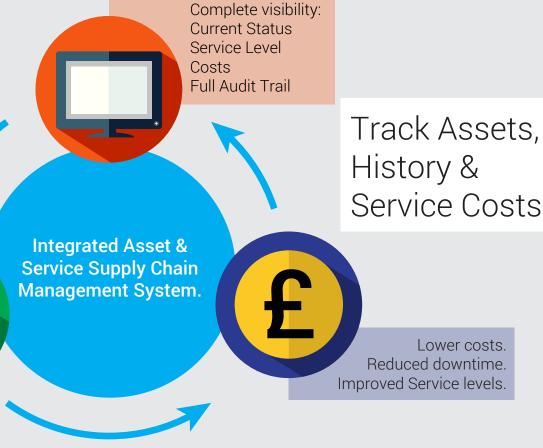

The lack of real-time visibility of whats happened.

What do Retailers Need?

What is the Solution?

Service & Asset Management Keep track of assets, customers, servicing

schedules in one central place. Manage planned servicing intervals more effectively with complete visibility.

Mobility Apps Support your team in any situation with a

mobility app built around your business. Bespoke field service forms and workflows, mobility apps work both offline and online on a variety of devices.

Match the right resource, with the right skills and the right parts to the right job in the most

effective manner for your business and your customers.

GPS Tracking Know where your field based employees are to

ensure your business is running at optimum efficiency. Increased visibility allows your team to make better decisions regarding job allocation and overall customer service.
